DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15 and 18-35, drawn to a web or sheet containing structurally defined element that includes an adhesive outermost area, classified in class 428, subclass 343.

Group II, claim(s) 16,17,36 and 37, drawn to edge lighted panel with light guide and specific film or coating, classified in class 362, subclass 627.

The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II are unrelated. In the instant case, the different groups have dissimilar classification in two diverse classes. Because these groups are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the groups have acquired a separate status in the

art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48 (b) and the fee required under 37 CFR 1.17(i).
